DETAILED ACTION

1. Claims 1-12 were pending in the instant application at the time of the issuance of the previous Office Action, mailed August 22, 2007. By the latest response from the applicant, filed November 23, 2007, new claims 13-16 are added. Therefore claims 1-16 are pending and have been examined.

Response to Arguments

2. Applicant's arguments filed November 23, 2007 have been fully considered but they are not fully persuasive. The Applicant argues that the addition of language to claim 1 of a certificate stored on a computer-readable "storage" medium overcomes the rejection of claims 1-3 under 35 USC Sec. 101. However, the Examiner maintains that claims 1-3, and new claim 13, are still directed towards non-statutory subject matter and that the rejection of the claims should be maintained. The certificate set forth in claim 1 represents a mere compilation of data, and not computer program code that causes a change of state in a processor when executed. Therefore the claim is directed towards mere functional descriptive material and is not rendered patentable by its storage on a computer-readable storage medium. The rejection of the claims is set forth in more detail infra.

Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claims 1-3 and 13 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Changes have been made via the latest amendment to the language of claim 1 by the addition of language directed towards storage of the certificate on a computer readable storage medium. However it is not clear from the language of the claims how the X.509 certificate can be considered as executable code capable of causing a change in a computer apparatus. The X.509 certificate is in fact mere data that another program may act upon when it is read out from the memory medium. Claims 1-3 and 13 claim a mere arrangement of data. As such, embodying the data on a computer-readable storage medium would not make the claims statutory. See MPEP 706.03(a) and, especially, 2106 IV B 1 (b).

Allowable Subject Matter

5. Claims 4-12 and 14-16 are allowed.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
